THE BEST WHITE PAINT COLORS FROM BENJAMIN MOORE & SHERWIN WILLIAMS

KELLY PAULSON

BENJAMIN MOORE

Simply White -

A flexible white that can go simply, anywhere. It has enough warmth to be used on walls in a modern or traditional home. A brighter white but not as bright as Chantilly Lace. This is a simply versatile paint color.

It is great for cabinets, trim and doors as it still feels fresh and crisp.

Maritime White -

I use this white a lot in spaces with travertine or pinky-beige tile.

Use if you're looking for a bit of warmth in your white paint.

Decorator's White -

It holds just a touch of gray that doesn't look too sterile or yellow in most light. A modern cabinet color favorite, and a great choice for pairing with a gray space.

This is a great choice when pairing with quartz, marble, or a room painted in cool colors.

White Dove -

A clean white that feels custom and natural creamy greige. Cabinet favorite because it has very little yellow making it a versatile, warm white.

Use this on cabinets, trim and walls!

Chantilly Lace -

This is a bright white with without any noticeable nuances (i.e. yellow). This clean, crisp white is my go-to for trim, doors, and ceilings. It can appear a bit sterile in some environments, so make sure you test this one.

Use this If you're looking for a pure white, that is bright and crisp. Use on ceilings as well.

Intense White -

This is an off-white with a hint of green and bit of gray. I wouldn't call it intense, but versatile! This color can even be used as a main color or exterior.

Use paired with gray, greens where your looking for a crisp contrast.

Calm -

A warmer white with a greige hue. It is part of the Benjamin Moore off-white collection as it offers subtle nuances of white.

Test this one but use calm with greighes and warm counters and tile.

Cloud White -

An off-white color, this is a favorite white from Benjamin Moore. Although this paint has a slight creamy yellow hue, It is a neutral, warm, cream without feeling too yellow. This pairs with most colors if you're looking for a soft white this is your color.

Great to use on cabinets, millwork and ceilings.

Crisp Linen -

This white has a touch of warmth. A truly classic cream.

Use this when pairing with warm colors.

SHERWIN WILLIAMS

Eider White -

A greige white that pairs well with gray and cool colors. Not a true white, but does have a hint of warmth so make sure you test and compare this color before pairing with counters and trim.

Use it as a trim or main color.

Alabaster -

Probably the most popular white from Sherwin, a versatile white that works in most environments.

Pair with gray and blues.

Westhighland White -

This paint color has a slight yellow that creates a nice creamy base.

Perfect paired with most colors when looking for a soft contrast.

Creamy -

A go-to cream for Sherwin Williams. This white is actually cream with a touch of yellow for that soft warmth.

Great for exterior / interior trim to soften up a warmer main color and tone down the contrast.

Natural Choice -

A warm cream white with out a lot of yellow. Also a beautiful choice to use on your walls if you looking to add a warm white to a room without looking too tan.

Extra White -

The go-to bright clean true white. No noticeable color hues in this white, just a perfect bright white.

Use this for trims, ceiling and millwork.

Incredible White -

A really lovely white that has a bit of greige to it. So incredible you'll want to paint your whole space in it. A perfect amount of warmth to add color, with no yellows.

A perfect white for walls and paired with pure white for trim.

Dover White -

This is a creamy white that has so much warmth you might want to use it as a main color. A true go-to cream color. Similar to Creamy but a touch more peach.

Great to use as a wall color or bathroom cabinets and travertine tiles.

Pure White -

With just a touch of gray to this white, it is a great clean white that won't read yellow.

Pair it with grays, or use as a ceiling and trim color.

Snowbound -

A white with a touch of pink that you rarely can see. I use this color often to add just a hint of warmth to any space.

It works nicely for ceilings and paired with greige or warm wall colors.

With all colors, don't forget to test your colors. Compare large color swatches to your fixed elements such as counters, tile, and carpet to make sure you have chosen the right color.
